RUSTIC IRON
All Rustic Iron finials can be adapted to fit any style and diameter of rod.

NEW!
Rustic Iron Collection can be specially treated for outdoor use with an upcharge.
(Rustic Iron Traversing cannot be treated for outdoor use.)
3/4" Solid Hammered Iron Rod HDW20229

3/4" Hollow Iron Rod HDW20228

7/8" Solid Iron Rod HDW20230

1" Hollow Iron Rod HDW20226

1 1/2" Hollow Iron Rod HDW20227

1" Square Iron Rod HDW20231

*Maximum length per rod is 106". Rods will be automatically spliced thereafter. Please note to order a connector for each splice. A center support bracket must be ordered to hold the spliced area at the union of the rods.

**NEW!**
Rustic Iron Collection can be specially treated for outdoor use with an upcharge.
(Rustic Iron Traversing cannot be treated for outdoor use.)

*(Minimum of 3ft traversing rod required) A set includes: rod, traverse track, Somfy motor, end brackets master carrier and (4) sub-carriers per ft. Must specify sub-carrier style preferred.

See page 9 for optional sub-carrier styles available.

Please note: Each rod operates independently; double rods will come with 2 motors; one for each rod. Rings sold separately.

All round traversing rods are 1 1/2” Dia. All square traversing rods are 1 1/2” Dia.

Note: Fascia length is 1” longer than the track length. (See drawing details on page 9)

SOMFY CONTROL OPTIONS WIRELESS RADIO TECHNOLOGY

*Wireless 5 Channel Wall Mount (Battery-powered, no electrician needed)

- HDW20403
- HDW20404
- HDW20405

*Wireless Handheld 5 Channel Remote

- Silver: HDW20402
- Black: HDW20386
- White: HDW20387

*5 channels allow for control of up to 5 individual motorized window coverings, or 5 groups of motorized window coverings, or a combination of the two.

A control unit is required to operate motorization.
SOMFY MOTORIZATION INFORMATION

• Ultimate in home convenience
• For light to heavyweight draperies; Up to 36ft and 132 lbs
• Control single or multiple motorized draperies using the same remote
• Easy installation- Motor can be installed to the right or left side of the track
• Standard or inverse motor mounting available with 10 ft cord
• Belt driven track
• Motor design and the use of a timing belt provides quiet operation
• Automatic or adjustable settings
• Manual override; Disengages motor when adjusted manually- ideal for power outages

• Soft start and soft stop; adjustable speeds
• Patented cover design conceals unsightly cables and protects the connectors and control modules inside the motor
• Plug-in modules adapt to various technologies to easily integrate with home automation systems
• Patented flexible master carrier reduces friction and is adaptable to various drapery types
• Sub-carrier types will be determined by the style of draperies. Please specify the sub-carrier style when ordering, Ripplefold® available in 80, 100 and 120% fullness
• Ceiling mount installation available
• Wireless remote and wireless battery-powered wall mount controls are available and no electrician needed

- Entry Level = $  
- Mid Level = $5  
- High End = $$
GLOSSARY

**Base/Height** - This describes the vertical measurement of an item that lays flat against the wall. For example: A bracket base/height is the flat area that goes against the wall.

**Bracket** - A hardware component that is attached to the wall or casing to support both ends of a drapery or curtain rod/pole.

**By-Pass Bracket** - By-Pass brackets are used for drapes to pass thru the center support bracket. This system is available for round rods only, not for use with square or hammered rods. A “C” ring is used that will pass through the by-pass bracket.

**“C” Ring** - This style of ring is designed to be used with a by-pass bracket system, so that the rings can slide through a center bracket.

**Carrier/Glide** - A plastic or metal tab that is inserted into the traverse track and used to attach the drapery panel to the traverse rod.

**Ceiling Bracket** - This type of bracket is used when there is not an area on the wall that it can be mounted on.

**Center Bracket** - A bracket made to mount over the top of a window to support the additional weight in the center of the curtain/drapery rod when there is not enough vertical space to accommodate a standard bracket.

**Center Draw** - A term used with traversing rods to note that the drapery panels will close at the window’s center point.

**Center Splice** - This type of bracket is used when joining two poles together to achieve longer spans while at the same time concealing the resulting seam.

**Connector & Connector Screw** - A light weight tube used to connect two metal rods. It also provides strength at the point of connection. A connector screw is a double ended screw that is used to attach the ends of two wood poles together.

**Elbow Connectors** - (Corner angles) An adjustable corner angle that attaches two rods together. This item can be used in bay windows or around corners to keep seamless rod flow.

**End Bracket** - These brackets can be decorative in nature or simple metal grips that hold a drapery rod to the wall or ceiling. These can also control the depth of projection from the wall.

**Faux Finish** - This term is used to describe a special painterly technique. The image of wood, bamboo or aged metal is created by the “faux” painting effect. This stunning faux appearance can only be achieved by a highly skilled artisan.

**Finial** - These pieces are used as decorative embellished ornaments on the ends of a drapery rod/pole or applied on furniture such as on top of a bed post.

**Gold & Silver Leaf** - Authentic gold or silver metal material which is milled through a roller into paper thin sheets.

**Inside Mount Bracket** - This type of bracket allows a rod/pole to fit securely inside the window frame or wall corner. Inside mounts do not allow for finals.

**Length** - Refers to the horizontal measurement of a finial or the overall span of a drapery rod/pole.

**Master Carrier** - The arm of the traverse track that holds the edge of the drapery. They are available in one-way draw (one master carrier) or central draw (one master carrier and one overlap arm to hide the drapery closure).

**One-Way Draw** - A term used with traversing rods to note that the drapery panel is designed to open in one direction.

**Overall Projection** - This term is used to describe the measurement of the entire distance the item would protrude from wall.
**Pin On Hook** - This is a metal pin that slides into pleated draperies to attach them to the rings or carrier/glide.

**Pole/Drapery Rod** - Curtains and draperies are generally suspended from a rod or pole which sits across the top of a window or entryway. Poles can come in a wide variety of styles and materials.

**Projection** - This describes the measurement of how far an item protrudes from the wall. For example: A tieback base is installed on the wall and the distance between the wall and how far the tieback projects out determines the projection.

**Projection from Center** - This measurement is the distance from the wall to the center opening of a bracket.

**Return** - The flat portion of a drapery heading that wraps around the corner of the rod to cover the end of the rod and the bracket.

**Ring** - These items are sewn or hooked onto a curtain or drapery panel heading, then placed on a rod/pole allowing the fabric panel to move back and forth (open and close) freely on the pole.

**Rosette** - Rosettes offer a decorative embellished accent to hold valances and swags in a fixed position in lieu of drapery rod or pole.

**Sockets** - This type of bracket is primarily used for inside mounts and wall to wall installations. One must order both an open and closed socket for proper ease of installation.

**Tieback** - This fixed decorative item is anchored to the wall, usually to the side of a window. It secures the curtain or drapery panel away from the door or window, while allowing for the passage of light and adding a decorative element to a room.

**Tracking System** - A metal track unit that is inserted into a wooden or aluminum rod; this tracking unit operates manually by using a wand/baton to move the carriers/glides to open and close drapes.

**Traversing Rod System** - A rod that incorporates a metal tracking unit, with glides that attach the drapery panel to the traverse rod. A cord pulley system opens and closes by drawing the cord. A decorative faux ring option is available in lieu of a simple carrier/glide. This system also allows for manual hand drawn operation.

**U-Shape Tieback** - This is the basic piece of hardware for holding the draperies away from the window in a decorative swag. When purchasing this type of swag holder, one must also purchase a decorative finial to be attached to complete the unit.

**Wall Mounted Rod** - A rod that is bent and returns to wall to be mounted. There is no decorative finial needed for this application. The mounting socket units are included with this type of rod.

**Wand/Baton** - A long handled rod attached to a ring or a master carrier used to assist opening and closing movement of the curtain/draperies.

**Water Gilding** - This ancient technique of applying gold or silver leaf requires a true artisan to produce. Laborious time-staking steps and procedures are used to create the smooth metal finish outcome. Due to the technical details of these processes, and to preserve its special qualities, the technique is secretly kept so that not one individual can complete all the steps.

**Width** - This describes the measurement used for the widest area of an item.

FINISHES
The finishes in Signature and Barbara Barry Indochine collections are a combination of hand painted faux and water gilded finishes which are applied by experienced artisans. Due to the nature of this process, a slight variation of color may occur from piece to piece. This variation creates a one-of-a-kind product and adds to the unique nature of this hand made work of art. All Photography is, at best, a representation of color. Actual finishes may vary slightly.

RECOMMENDATIONS
Please consult a professional installer for the application of all drapery hardware products.

We recommend a minimum of three support brackets for every 8 feet of pole length.

When a pole is re-cut to be made smaller, a new opening/hole will need to be made. That opening should be 3/16” or 5mm to allow for the finial screw to fit properly into the drapery pole.

When screwing a finial into a pole, the finial should be handled by the base only to allow for a proper fit and alignment.

All cord traversing comes with floor pulleys and include safety tag attached to the floor pulley, compliant with the new Child Safety Device regulation. Customers must install the floor pulley so the cord is not dangling.

TERMS
Terms are to be PAID IN FULL at time of order. Shipments are F.O.B. Bethpage, N.Y. or F.O.B. Anderson, S.C.

PRICES
Prices herein quoted are net wholesale. Prices are subject to change without notice. All shipping charges are additional. PRICES DO NOT INCLUDE GST.

ORDERING
When placing an order be sure ALL information is given, including item name or number, finish color, all shipping instructions and markings.

Rush options are available on some Custom Collections. Please inquire with our drapery hardware customer service for details and additional charges for this service. 800 648 5728 Ext. 2484

Rustic Iron Traversing Collection can be modified to curve or bend on Round Rods only. A design template must be submitted for approval first, and then up charges for this customization can be obtained. Please contact our drapery hardware customer service for more information. 800 648 5728 Ext. 2484

SHIPPING
Rods and poles up to 106” and traversing rods up to 102” ship Fed-X ground, unless specified otherwise. Any longer lengths will ship by freight carrier.

INQUIRIES
When inquiring about an order always be sure to list the item number or name, finish color and quantity required.

RETURNS & CLAIMS
No returns will be accepted unless Kravet authorization has been given.

Your request for return authorization must include the invoice number, date of invoice, pattern, finish color, quantity and reason. All returns must be made within 30 days of invoice date.

Refused shipments, customer duplication of orders, or cancellations after shipment has been made are subject to a 25% re-stocking charge and all freight charges.

Items can not be returned for credit if it has been processed by the purchaser in any way.
